

Dress Net and Tulle

Fine English Tulle

World leaders in the manufacture of dress net and tulle

Many of the world's major bridal, prom and high street fashion brands trust Heathcoat to supply superior quality warp knitted apparel fabrics, nets and tulle.

Our bespoke manufacturing service alongside a vast range of in-stock lining mesh, hi-vis gilet fabrics, illusion nets, metallic nets and lamination scrims make us their first choice supplier.

Unparalleled quality and range

Heathcoat Fabrics is a leading EU fabric technologist and specialist in the manufacture of regulation compliant fabrics.

We manufacture bespoke two- and three-bar polyester and nylon fabrics in a number of refined textural finishes. Rapid delivery is important to our customers, so we carry an extensive range of over 60 stock-supported product lines.

We've supplied fabrics for the bridal wear of the British Royal Family; costumes on well-known TV productions such as 'Dancing on Ice' and 'Strictly Come Dancing' as well as the Olympic Games ceremonies; and lingerie fabrics for high street retail outlets around the world.

Customer benefits

Quality: You get the best quality product in the world. For the past 200 years, our reputation for unequalled quality has grown and grown. We are ISO9001 and ISO14001 certified, and have adopted the quality and environmental control procedures more usually associated with technical textiles.

Colourising: You get the perfect colour from our in-house dyeing facility. We colour dye to exacting control standards, so where a very specific shade is required we can colour-match to your precise requirements – and our fluorescent colours are unique. Clients look to us for REACH compliance and Azo-free dyes.

Choice: You get what you need either from stock or from our own bespoke manufacturing. We create fabrics in many weights, colours, handles and finishes. Our fabrics are suitable for veiling, bridal accessories, embroidery, ribbons and decorations, hi-vis applications, carnivals and lingerie.

Why Heathcoat 1808® Fabrics keep you safe

We developed our unique 'Flare Free' and 'Zero4' treatments in response to the ever-demanding global regulations placed on our customers. 'Flare Free' conforms to the EU Directive EN71 : 2 and reduces flammability, giving the confidence that our fabrics are safe for use in children's costumes.

'Zero4' addresses customer concerns by reducing the risks of formaldehyde exposure to the skin. In addition, our stringent REACH awareness and ID procedures ensure that no banned substances ever enter our supply chain.

Dress Net and Tulle

Dance fabrics

To satisfy discerning creative designers, our costume and dance tulle and nets offer a host of refined textural finishes in our standard range of over sixty exciting stock-supported colours; as well as sparkle and metallic finishes.

Our selection of dress nets for tutu and dancewear are used by leading Ballet and contemporary dance companies around the world. These specifically engineered products incorporate our patented stiff Flare-Free finish. All of our products are treated and colour-dyed to exacting control standards and uniquely, we can also colour-match to our customers' precise requirements.

Additional customer benefits

Delivery: You can count on us during tight turnarounds. Heathcoat has a dedicated sample room enabling us to process same-day requests for samples. We ship our products around the world in a way that suits you. For example we can mix consignments in single containers, and since we hold extensive stock we can guarantee the fastest possible delivery.

Language: Your requirements will be understood and acted upon. Heathcoat has EU multi-lingual customer service and sales teams. Our dedicated account managers are trained to understand and meet your market specific needs.

Our range of warp knitted textiles includes:

- diamond winkler nets
- satins
- metallic nets
- fishnets
- queenscord
- reverse locknit
- marquissette
- mesh
- sharkskin
- squaremesh
- honeycomb mesh
- rigid eyelet mesh
- voile

Protecting your customers and the environment

Heathcoat is recognised globally as a leading driver behind banning harmful chemicals and substances. We take pride in being fully conversant with the REACH regulations.
