## Generator & Heater Hire

### Generator hire with full power distribution for weddings and events

We offer a complete service which complies with BS7909 (Electrical legislation for outdoor events) and you will receive full certification on completion of our works. Many companies do not offer this, or if they do it may not be the full certification. Like all other industries, the leisure and events sector must comply with certain guidelines. Failure to do so, should something go wrong, could result in the event organiser being held for negligence. Size of event or celebration is immaterial. It is anything from an event in a back garden, to a music festival. If electrics are involved there are certain guidelines to follow.

Full power distribution includes cables and sockets to catering, bar, stage, toilets, main marquee/ tipi lighting, plus any other reasonable socket requests.

Whilst we appreciate weddings and events are costly, we always advise a back up generator. This isn't essential and is at the discretion of the client, however, no matter how well maintained an engine, there are times when it can fail. Our kit is serviced and maintained to the highest level but unfortunately nothing in life is guaranteed! In the event of a failure we would get you as soon as possible, depending on the distance we aim for less than an hour but can't guarantee.

If your event is at home then a secondary set may not be necessary as we could potentially leave emergency cables in situ going to the house or other building in case of emergency.

Costs:	£
20 KVA (3ph) Generator with full distribution and certification including 12 hours running time & fuel Additional running time £5 + VAT per hour	£450 + VAT
40 KVA (3ph) Generator with full distribution and certification including 12 hours running time & fuel Additional running time £7 + VAT per hour	£525 + VAT
60 KVA (3ph) Generator with full distribution and certification including 12 hours running time & fuel Additional running time £8 + VAT per hour	£575 + VAT
Secondary standby generator	£250 + VAT

***Price subject to Delivery charge POA***

## Heater Hire

All our heaters are gas (But do also need an electric supply to operate) and are much more efficient than the traditional diesel/oil fired marquee heater. Gas is much cleaner to work with on site, meaning no spillages of fuel causing contamination on grass etc. Heat is virtually instant with these heaters unlike the oil fired which blow cold air in for a time until the air is heated.

The heaters work by being positioned on the outside of the marquee/Tipi and heat up air from the outside and blow it in through a ducting system. You can't under any circumstance position these, or indeed oil fired heaters, inside a marquee.

Costs

£

TS80 including 12 hours running time/fuel  
 TS170 including 12 hours running time/fuel

£180 + VAT  
 £195 + VAT
