

# Tips on Flowers

It can seem overwhelming to begin with so here are some tips.

Do a little bit of homework before visiting your florist. The internet, bridal magazines and photos from other weddings are a great source of inspiration.

Think about if your wedding has a theme and how you feel flowers will carry that theme through.

Flowers may be included because of their special meaning or they could hold personal memories to the bride and groom.

Work within the seasons. Although many popular flowers like roses, lilies, Singapore orchids are available all year round, many other flowers are seasonal, so prices fluctuate depending on which month you are getting married in.
